O: What makes the gameplay in Mr. Null's Wicked?

Autor: dbbre - 2026/06/22 15:34

The gameplay in Mr. Null's Wicked Wares is built around a multiplier system where values multiply instead of adding together. For example, a 5x and 4x multiplier combine into 20x rather than 9x. Pragmatic Play designed this mechanic to increase volatility and create the possibility of sudden high-value outcomes during bonus sequences and feature activations
